**Essential Question** How can you find the volume of a prism?

1 ACTIVITY: Pearls in a Treasure Chest

Work with a partner. A treasure chest is filled with valuable pearls. Each pearl is about 1 centimeter in diameter and is worth about $80.

Use the diagrams below to describe two ways that you can estimate the number of pearls in the treasure chest.

a.

1 cm

60 cm

120 cm

60 cm

b.

c. Use the method in part (a) to estimate the value of the pearls in the chest.

### 2 ACTIVITY: Finding a Formula for Volume

Geometry

In this lesson, you will
- find volumes of prisms.
- solve real-life problems.

Work with a partner. You know that the formula for the volume of a rectangular prism is $V = \ell wh$.

a. Write a formula that gives the volume in terms of the area of the base B and the height h.

b. Use both formulas to find the volume of each prism. Do both formulas give you the same volume?
## 3 ACTIVITY: Finding a Formula for Volume

Math Practice

Use a Formula
What are the given quantities? How can you use the quantities to write a formula?

Work with a partner. Use the concept in Activity 2 to find a formula that gives the volume of any prism.

4 ACTIVITY: Using a Formula

STEM
V I D E O

Work with a partner. A ream of paper has 500 sheets.

a. Does a single sheet of paper have a volume? Why or why not?

b. If so, explain how you can find the volume of a single sheet of paper.

What Is Your Answer?

5. **IN YOUR OWN WORDS** How can you find the volume of a prism?

6. **STRUCTURE** Draw a prism that has a trapezoid as its base. Use your formula to find the volume of the prism.
Practice

Use what you learned about the volumes of prisms to complete Exercises 4–6 on page 380.

BigIdeasMath.com

The *volume* of a three-dimensional figure is a measure of the amount of space that it occupies. Volume is measured in cubic units.

🔑 Key Idea

Volume of a Prism

Words The volume V of a prism is the product of the area of the base and the height of the prism.

area of base, B

height, h

area of base, B

height, h

Remember

The volume V of a cube with an edge length of s is $V = s^3$.

Algebra $V = Bh$

Area of base ⟶ ⟵ Height of prism

EXAMPLE 1 Finding the Volume of a Prism

**Find the volume of the prism.**

Study Tip

The area of the base of a rectangular prism is the product of the length ℓ and the width w.

You can use $V = \ell wh$ to find the volume of a rectangular prism.

$V = Bh$ Write formula for volume.

$= 6(8) \cdot 15$ Substitute.

$= 48 \cdot 15$ Simplify.

$= 720$ Multiply.

∴ The volume is 720 cubic yards.

15 yd

8 yd

6 yd

## EXAMPLE 2 Finding the Volume of a Prism

Find the volume of the prism.

$V = Bh$ Write formula for volume.

$= \dfrac{1}{2}(5.5)(2) \cdot 4$ Substitute.

$= 5.5 \cdot 4$ Simplify.

$= 22$ Multiply.

∴ The volume is 22 cubic inches.

2 in.

4 in.

5.5 in.

On Your Own

**Find the volume of the prism.**

1.
2.
EXAMPLE 3 — **Real-Life Application**

A movie theater designs two bags to hold 96 cubic inches of popcorn.
(a) Find the height of each bag. (b) Which bag should the theater
choose to reduce the amount of paper needed? Explain.

Bag A

3 in.
4 in.

Bag B

4 in.
4 in.

a. Find the height of each bag.

Bag A	**Bag B**
$V = Bh$	$V = Bh$
$96 = 4(3)(h)$	$96 = 4(4)(h)$
$96 = 12h$	$96 = 16h$
$8 = h$	$6 = h$

∴ The height is 8 inches.   ∴ The height is 6 inches.

b. To determine the amount of paper needed, find the surface
area of each bag. Do not include the top base.

|	
Bag A	**Bag B**
$S = \ell w + 2\ell h + 2wh$	$S = \ell w + 2\ell h + 2wh$
$= 4(3) + 2(4)(8) + 2(3)(8)$	$= 4(4) + 2(4)(6) + 2(4)(6)$
$= 12 + 64 + 48$	$= 16 + 48 + 48$
$= 124 \text{ in.}^2$	$= 112 \text{ in.}^2$

∴ The surface area of Bag B is less than the surface area of Bag A.
So, the theater should choose Bag B.

On Your Own

Bag C

4 in.
4.8 in.

3. You design Bag C that has a volume of
96 cubic inches. Should the theater in
Example 3 choose your bag? Explain.

✓ Vocabulary and Concept Check

1. **VOCABULARY** What types of units are used to describe volume?

2. **VOCABULARY** Explain how to find the volume of a prism.

3. **CRITICAL THINKING** How are volume and surface area different?
