Vocabulary Flash Cards

The set of all points in a plane that are the same distance from a point called the center

The point inside a circle that is the same distance from all points on the circle

See circle.

A figure made up of triangles, squares, rectangles, semicircles, and other two-dimensional figures

The distance around a circle

The ratio of the circumference of a circle to its diameter

The value of π can be approximated as 3.14 or $\frac{22}{7}$.

The distance across a circle through the center

See circumference.

One-half of a circle

The distance from the center of a circle to any point on the circle

See circumference.
